

7.11 Response to Reviewer Comment:

The department follows a structured approach to asset management, reviewing key reports annually to guide capital planning and infrastructure sustainability.

- The Financial Fixed Asset Report (EOC 1 on Garlandcapra website) identifies depreciation and replacement needs for capital assets.
- The Facility Condition Assessment Report (EOC 5) is reviewed regularly by the Facilities Management Department and used as a tool for PARD to help determine priorities for CIP submissions.
- The Annual Fleet Evaluation (EOC 7) assesses vehicle and equipment performance to determine replacement needs.

These reports support data-driven decision-making for capital investments. Additionally, major facility and equipment replacements, such as Holford Recreation and Aquatics Center and Surf and Swim (EOC 6), demonstrate the department's commitment to long-term asset management.
